## PROFESSIONAL SUMMARY

Software Engineer with 1 year of experience in C#, ASP.NET, and SQL Server, specializing in backend development, API development, and database management. Experienced in building scalable 3-tier applications using ADO.NET, following SDLC practices, and deploying solutions on AWS EC2 with strong focus on query optimization.

## SKILLS

- **Programming:** C#, Java
- **Frontend:** HTML, CSS, JavaScript, React, Bootstrap, Razor Views
- **Backend:** ASP.NET MVC, ASP.NET Web API, ADO.NET, Node.js, Express.js, Entity Framework
- **Database:** SQL Server, MongoDB, MySQL
- **Tools:** Git, GitHub, Bitbucket, Postman, Visual Studio, SQL Workbench, AWS EC2, Swagger, Vite
- **Concepts:** OOPS, MVC, REST APIs, Query Optimization, Cloud Scalability, SDLC, Windows Service

## WORK EXPERIENCE

### Software Engineer

June 2025 – Present

Novac Technology Solutions, Chennai

- Designed and maintained Loan Management System (LMS) using C# and 3-tier architecture.
- Implemented modules for loan approval, document verification, and asset management.
- Optimized SQL stored procedures by 20% through indexing and query tuning.
- Established new REST API endpoints using ASP.NET Core Web API and Entity Framework Core.
- Developed user interfaces using ASP.NET Core MVC and Razor Views.
- Debugged and resolved production issues, reducing system errors by 30%.
- Implemented JavaScript validations to improve data accuracy and reduce input errors.
- Worked on data migration between different systems using SQL stored procedures.
- Collaborated in Agile environment using Jira for task tracking and Git/Bitbucket for version control.
- Hosted LMS on AWS EC2 using separate instances for C# and SQL Server.
- Developed Windows Services to trigger automated email notifications to clients and source branches.

## PUBLICATIONS

### Ensemble Based Approach for Bitcoin Price Prediction

IEEE Xplore, 2025

- Published an IEEE research paper proposing an ensemble deep learning model combining LSTM and GRU networks for Bitcoin price prediction, achieving an R2 score of 0.986 with improved forecasting accuracy.
- DOI: 10.1109/ICCCI64711.2025.11086125

## CERTIFICATIONS

- **Foundational C# with Microsoft** Feb 2026 – Mar 2026
- **Online MERN Stack Internship** Jul 2024 – Sep 2024

## EDUCATION

### Bachelor of Engineering in Computer Science

2021 – 2025

Kongu Engineering College

CGPA: 7.44
