PROFESSIONAL SUMMARY

Software Engineer with 1+ year of experience building enterprise FinTech applications in C#, ASP.NET Core and SQL Server. Reduced production errors by 90% and improved SQL performance by 20% on the Loan Management System for Shriram Finance Group. Full-stack across REST APIs, Entity Framework Core, React, AWS EC2 and Jenkins.

CORE COMPETENCIES

- **Backend:** C#, .NET, ASP.NET Core, ASP.NET Web Forms, Web API, LINQ, Entity Framework Core, ADO.NET, Windows Services
- **Frontend:** React, JavaScript, HTML, CSS, Bootstrap, Razor Views
- **Databases:** SQL Server (stored procedures, indexing, query optimization, T-SQL), MySQL
- **Cloud & DevOps:** AWS EC2, Jenkins, Git, GitHub, Bitbucket
- **Security:** Vulnerability Remediation, JWT Authentication, SAST (Checkmarx)
- **Concepts:** OOP, MVC, REST APIs, Dependency Injection, SDLC, Agile, Layered Architecture
- **Tools:** Postman, Swagger, Visual Studio, Jira

WORK EXPERIENCE

Software Engineer — June 2025 – Present

Novac Technology Solutions, Chennai

Loan Management System (LMS) – Enterprise FinTech Application for Shriram Finance Group

- Implemented ASP.NET Core Web API endpoints using dependency injection for service and data-access layers, with Entity Framework Core for entity mapping and CRUD operations.
- Optimized SQL Server stored procedures through indexing and query tuning, improving performance by 20%.
- Diagnosed and resolved production issues, reducing system errors by 90%.
- Built 20+ responsive screens using ASP.NET Core MVC, Razor Views and React.
- Implemented ASP.NET Web Forms modules for asset management, loan expenses, logistics and dealer operations.
- Automated email notifications through Windows Services, handling 10,000+ emails per day for clients and source branches.
- Deployed and maintained the application on AWS EC2 using separate instances for the application and SQL Server.
- Managed Git/Bitbucket merges and used Jenkins CI/CD pipelines to build and deploy production patches in an Agile team.
- Remediated 100+ application vulnerabilities and SAST findings identified by Checkmarx and security assessments.
- Executed manual functional and regression checks across LMS modules to validate new features, verify bug fixes and identify unintended changes before production releases.

PROJECTS

Customer Contact Management System — *React, ASP.NET Core, SQL Server, JWT*

github.com/Vishnu51cse/customer-contact-system

- Built a full-stack application using React, ASP.NET Core Web API, SQL Server and Entity Framework Core, with dependency injection for application services.
- Implemented user registration, login and JWT authentication, with REST APIs for record management and search, restricting access to each user's own records.

Personal Expense Tracker System — *ASP.NET Core MVC, SQL Server, JWT*

github.com/Vishnu51cse/personal-expense-tracker

- Built an expense tracking application with ASP.NET Core MVC, Razor Views and SQL Server to manage personal expenses.
- Integrated JWT authentication, dependency injection and Entity Framework Core, separating application logic from the presentation layer.

PUBLICATION

Ensemble Based Approach for Bitcoin Price Prediction — IEEE Xplore, 2025

LSTM and GRU ensemble model for Bitcoin price forecasting (R-squared 0.986). DOI: 10.1109/ICCCI64711.2025.11086125

EDUCATION

Kongu Engineering College — 2021 – 2025

Bachelor of Engineering in Computer Science
