PROFESSIONAL SUMMARY

Software Developer (.NET) with 1+ year of experience in C#, ASP.NET Core, Web API, MVC, SQL Server, and ADO.NET. Experienced in developing enterprise FinTech applications, REST APIs, SQL optimization, and AWS deployment. Seeking a growth-oriented opportunity to build a successful career while contributing to organizational goals and continuously enhancing my technical skills.

SKILLS

- Programming:** C#, Java
- Frontend:** HTML, CSS, JavaScript, React, Bootstrap, Razor Views
- Backend:** ASP.NET Core MVC, ASP.NET CORE Web API, ADO.NET, Node.js, Express.js
- Database:** SQL Server, MongoDB, MySQL
- Tools:** Git, GitHub, Bitbucket, Postman, Visual Studio, SQL Workbench, AWS EC2, Swagger, Vite, Jenkins
- Concepts:** OOPS, MVC, REST APIs, Query Optimization, Cloud Scalability, SDLC, Windows Service

WORK EXPERIENCE

Software Engineer

June 2025 – Present

Novac Technology Solutions, Chennai

Projects:

- Loan Management System (LMS) is a FinTech application for managing loan-related operations.
- Supports business processes including asset management, loan expenses, logistics, and dealer operations.

Responsibilities:

- Collaborated with Shriram Finance group to deliver solutions aligned with business requirements.
- Optimized SQL stored procedures by 20% through indexing and query tuning.
- Established new REST API endpoints using ASP.NET Core Web API.
- Developed user interfaces using ASP.NET Core MVC and Razor Views.
- Debugged and resolved production issues, reducing system errors by 30%.
- Implemented JavaScript validations to improve data accuracy and reduce input errors.
- Worked on data migration between different systems using SQL stored procedures.
- Collaborated in Agile environment using Jira for task tracking and Git/Bitbucket for version control.
- Hosted LMS on AWS EC2 using separate instances for C# and SQL Server.
- Developed Windows Services to trigger automated email notifications to clients and source branches.
- Performed unit tests and code coverage activities following development to ensure code quality.
- Merged code changes and triggered environment builds using Jenkins as part of the deployment process.
- Resolved application vulnerabilities identified through security assessment reports.

ACADEMIC PROJECTS

Ensemble Based Approach for Bitcoin Price Prediction

IEEE Xplore, 2025

- Designed and trained an ensemble deep learning model combining LSTM and GRU networks to forecast Bitcoin prices, achieving an R-squared score of 0.986.
- Preprocessed historical price data, engineered time-series features, and evaluated model performance to improve forecasting accuracy.
- Published findings as an IEEE research paper in IEEE Xplore, 2025. (DOI: 10.1109/ICCCI64711.2025.11086125)

CERTIFICATIONS

- Foundational C# with Microsoft
- Online MERN Stack Internship

Feb 2026 – Mar 2026
Jul 2024 – Sep 2024

EDUCATION

Bachelor of Engineering in Computer Science

Kongu Engineering College

2021 – 2025

CGPA: 7.44
